Krasnodar, Male

Hello, I am Software Developer with 2+ years work experience.

In my work I use three main principle:

1. Look before you leap - I always good preparing to perform a task. It helps to make solution better and provide right time estimation.
2. Keep It Simple - I think of complexity of my solutions. It helps to write clean and well supported code.
3. Don't stop developing of yourself. My profession is my passion, I often use my free time for self-development.
